VOLUME CONTENTS

Volume 58 (1988)

PHYSIOLOGY AND BIOCHEMISTRY

In vitro translated polypeptides of different organs of *Pharbitis nil* chois., strain violet under flower-inductive and non-inductive conditions
by M. Ono, M. Okazaki, H. Harada and H. Uchimiya (Nagano, Japan) 1–7

Alteration of lectin pattern in potato tuber by virus X
by C. Scheggia, A.E. Prisco, P.M. Dey, G.R. Daleo and R.P. Lezica (Mar Del Plata, Argentina and Egham, UK) 9–14

Sulfolipid associated with the light-harvesting complex associated with photosystem II apoproteins of *Chlamydomonas reinhardii*
by M. Sigrist, C. Zwillenberg, Ch. Giroud, W. Eichenberger and A. Boschetti (Bern, Switzerland) 15–23

Involvement of phytochrome in Ca^{2+}-dependent, calmodulin independent L-leucine uptake in *Brassica*
by A. Basu, U. Sethi and S. Guha-Mukherjee (New Delhi, India) 25–33

Changes in lipoxygenase activity during seedling development of *Lupinus albus*
by J.L. Beneytout, A. Najid and M. Tixier (Limoges, France) 35–41

Purification and characterization of a lysozyme from wheat germ
by P. Audy, J. Trudel and A. Asselin (Quebec, Canada) 43–50

GENETICS AND MOLECULAR BIOLOGY

Organelle composition in somatic hybrids between an atrazine resistant biotype of *Solanum nigrum* and *Solanum melongena*
by A. Guri and K.C. Sink (East Lansing, MI) 51–58

Sequence of a mitochondrial plasmid of sunflower (*Helianthus annuus*) and its relationship to other mitochondrial plasmids
by C. Perez, B. Dujon, P. Heizmann and A. Bervillé, (Dijon, Gif-Sur-Yvette and Villeurbanne, France) 59–69

DNA and histone synthesis are uncoupled during germination of maize embyros
by J. Zlatanova and P. Ivanov (Sofia, Bulgaria) 71–76

CELL AND TISSUE STUDIES IN VITRO

Effects of abscisic acid and analogues on the maturation of white spruce (*Picea glauca*) somatic embyros
by D.I. Dunstan, F. Bekkaoui, M. Pilon, L.C. Fowke and S.R. Abrams (Saskatoon, Canada) 77–84

Somatic proembryo formation and transient expression of a luciferase gene in Douglas fir and loblolly pine protoplasts
by P.K. Gupta, A.M. Dandekar and D.J. Durzan (Davis, CA) 85–92

Scanning electron microscopic study of the in vitro organogenesis of saffron stigma- and style-like structures
by H. Himeno, H. Matsushima and K. Sano (Kawasaki and Saitama, Japan) 93–101

Production of somatic embryos from carrot tissues in hormone-free medium
by D.L. Smith and A.D. Krikorian (Stony Brook, NY) 103–110

Somoclonal variation and resistance to *Verticillium* wilt in lucerne, *Medicago sativa* L., plants regenerated from callus
by A.O. Latunde-Dada and J.A. Lucas (Nottingham, U.K.) 111–119

Intergeneric and interspecific hybrids through in vitro ovule culture in the *Cruciferae*
by M.M. Hossain, H. Inden and T. Asahira (Kyoto, Japan) 121–128

GENERAL

Loss of short-day requirement for dormancy breaking of bulbils from gibberellic acid-treated plants in *Sedum bulbiferum*
by K. Terui and N. Okagami (Iwate and Miyagi, Japan) 129–134

PHYSIOLOGY AND BIOCHEMISTRY

Ca^{2+}-dependent protein kinase from alfalfa (*Medicago varia*): partial purification and autophosphorylation
by L. Börge, Z. Oláh and D. Dudits (Szeged, Hungary) 135–144

Regulation of energy supply under conditions of high photosystem I activity
by J. Winter and D. Mende (Göttingen, F.R.G) 145–150

Regulation of non-autotrophic carbon dioxide assimilation by ammonia in cultured cells of *Acer pseudoplatanus* L.
by K.M. Wright and C.V. Givan (Newcastle upon Tyne, U.K.) 151–158

Ion requirement of red light and blue light mediated inhibition of antheridiogenesis in the fern *Pteris vittata*
by A.R. Gemmrich (Ulm, F.R.G) 159–164

Wall-bound 1,3-β-D-glucan:orthophosphate glucosyltransferase activity from *Acacia* cultured cells
by Y. Liénart, J. Comtat and F. Barnoud (Grenoble, France) 165–170

GENETICS AND MOLECULAR BIOLOGY

The transit peptide of a chlorophyll *a/b*-binding protein is not sufficient to insert neomycin phosphotransferase II in the thylakoid membrane
by G. van den Broeck, A. van Houtven, M. van Montagu and L. Herrera-Estrella (Gent, Belgium) 171–176

Induced symbiosis mutants of pea (*Pisum sativum*) and sweetclover (*Melilotus alba annua*)
by B.E. Kneen and T.A. LaRue (Ithaca, NY) 177–182

CELL AND TISSUE STUDIES IN VITRO

Microtubule organization during early direct embryogenesis from mesophyll protoplasts of *Medicago sativa* L.
by M. Dijak and D.H. Simmonds (Ottawa, Canada) 183–191

Characterization of root clones obtained after transformation of monohaploid and diploid potato genotypes with hairy root inducing strains of *Agrobacterium*
by E. De Vries-Uijtewaal, L.J.W. Gilissen, E. Flipse, E. Sree Ramulu and B. De Groot (Wageningen, The Netherlands) 193–202

Nurse culture of low numbers of *Medicago* and *Nicotiana* protoplasts using calcium alginate beads
by P.J. Larkin, P.A. Davies and G.J. Tanner (Canberra, Australia) 203–210

Regeneration and characterization of somatic hybrids between *Brassica napus* and *Diplotaxis harra*
by K. Klimaszewska and W.A. Keller (Ottawa, Canada) 211–222

Procedure for the regeneration of plants from cell suspension protoplasts of tetraploid potato (*Solanum tuberosum* L.) cv. Desirée
by R. Tavazza, R.J. Ordáso and G. Ancora (Rome, Italy and Oviedo, Spain) 223–230

Maize in vitro pollination with single pollen grains
by H. Hauptli and S. Williams (Davis, CA) 231–237

Callus formation and plant regeneration in isolated pollen culture of rice (*Oryza sativa* L. cv. Taipei 309)
by M.S. Cho and F.J. Zapata (Manila, Philippines) 239–244

GENERAL

Modification of the phosphite induced resistance response in leaves of cowpea infected with *Phytophthora cryptogea* by α-aminooxyacetate
by P. Saindrenan, T. Barchietto and G. Bompeix (Paris, France) 245–252

Localization of a nuclear protein during development in the pea seedling
by J.P. Mitchell, N.S. Cohn and Z. Zhou (Athens, OH) 252–260

Subject Index Volume 58 261–263

Author Index Volume 58 265–266

Contents Volume 58 267–268
